Professional Summary

With over a year of designing, developing, and implementing full-stack web development, I possess extensive experience as a Full-Stack Developer. Knowledgeable with database systems like MySQL and MongoDB, as well as Java, Spring Boot, React, and Angular. Skilled in working in teams to develop scalable solutions and enthusiastic about addressing issues and producing top-notch apps that improve business performance. I aim to expand my knowledge and contribute my abilities to a vibrant team.

Professional Experience

Ananta Futuristic Solutions Pvt. Ltd.

Full Stack Developer | July 2023 – Present

Quick Commerce Platform (EETOJ)

Role: Full Stack Developer | Duration: January 2025 - January 2026

Tech Stack: React, JavaScript, TailwindCSS, HTML5, CSS3, Spring Boot, Java, Hibernate, MySQL, REST APIs

- Developed scalable **RESTful APIs** using **Java, Spring Boot, Spring Data JPA, and MySQL** for a Quick Commerce platform.
- Implemented **JWT-based authentication** and **Role-Based Access Control (RBAC)** for secure access across Admin, Store Manager, Delivery Partner, and Customer modules.
- Integrated **Spring Security** to secure APIs with authentication and authorization.
- Designed and implemented **Customer, Product, Order, Wallet, Coupon, and Referral** management modules.
- Developed a **real-time notification and messaging system** for order updates and user communication.
- Built **Referral Program APIs** including referral code generation, reward distribution, and referral history tracking.
- Implemented **Wallet Management APIs** for cashback, rewards, and transaction history.
- Designed optimized **MySQL database schemas** and entity relationships using **JPA/Hibernate**.
- Implemented **global exception handling**, request validation, and standardized API responses.
- Generated **Excel reports** for sales, orders, and business analytics using **Apache POI**.
- Collaborated with frontend developers to integrate REST APIs with **React.js** applications.
- Worked in an **Agile/Scrum** environment using **Git** for version control.

Human Resource Management System(HRMS) automation portal:

Role: Full Stack Developer | Duration: January 2025 - January 2026

Tech Stack: Angular, TypeScript, HTML5, CSS3, Spring Boot, Java, Hibernate, MySQL, REST APIs

- Developed a comprehensive HRMS web application to streamline employee management, including onboarding, payroll, leave tracking, and performance appraisal systems. The goal was to digitize manual HR operations and integrate department workflows.
- **Responsibilities:**
- Designed and developed responsive UI components using Angular and Nebular UI for dashboards, employee profiles, and reports.
- Implemented RESTful APIs in Spring Boot for modules like Attendance, Payroll, Recruitment, and Performance Management.
- Created secure Login & Role-Based Authorization for Admin, HR, Manager, and Employees.
- Integrated **file upload feature** for resumes and employee documents.
- Developed **Appraisal Workflow** to track goal setting, review cycles, and feedback using state machines.
- Connected MySQL database and optimized complex joins and stored procedures for report generation.
- Deployed app on cloud with environment-specific configs using Docker and Jenkins (optional if you used them).

Achievements:

- Reduced manual HR processing time by **60%** by automating attendance, payroll, and appraisal workflows.
- Improved employee satisfaction by **40%** through self-service features like leave requests and payslip downloads.

- Enabled HR to generate department-wise reports in **real-time**, reducing Excel dependency.

Vendor Registration System:

- **Role:** Full Stack Developer | **Duration:** Aug 2023 – Dec 2024
- **Tech Stack:** Angular, TypeScript, HTML5, CSS3, Spring Boot, Java, Hibernate, MySQL, REST APIs
- **Description:** Designed and developed a secure and scalable Vendor Registration System to automate the onboarding, verification, and approval of vendors. The system integrates with internal procurement workflows and supports compliance checks, document uploads, and status tracking.
- **Responsibilities:**
 - Built responsive **vendor registration forms** with validation using Angular Reactive Forms and Tailwind CSS for UI styling
 - Implemented **multi-step registration workflow**, including business details, tax information (GST/PAN), and document upload using RESTful APIs.
 - Developed backend modules in Spring Boot to handle **vendor approval flow, duplicate checks, and email/SMS notifications**.
 - Secured endpoints using **JWT-based authentication** and provided **role-based access control** for Admin, Procurement, and Vendor roles.
 - Integrated **MySQL database** with Hibernate ORM for vendor records, approval status logs, and audit trails.
 - Developed an **admin dashboard** for reviewing applications, assigning approvers, and generating filtered reports (approved, pending, rejected vendors).
 - Enabled **file upload** for statutory documents (e.g., GST certificate, company PAN, cancelled cheque) and saved them as byte arrays in the database.

Achievements:

- Reduced manual vendor onboarding time by **75%** by digitizing the registration and approval process.
- Improved procurement transparency and compliance by integrating real-time approval logs and auto-alerts.
- Enabled tracking of vendor status with a success rate of **90%+** verified vendor onboarding within 3 working days.

Job Portal System– For CareerConnect, Internal Recruitment Tool:

- **Role:** Full Stack Developer | **Duration:** May 2024 – Present
- **Tech Stack:** Angular, TypeScript, HTML5, CSS3, Spring Boot, Java, Hibernate, MySQL, REST APIs
- **Description:**
 - Designed and developed a dynamic Job Portal web application to automate the hiring process for candidates and HR teams. The portal supports job posting, resume submission, shortlisting workflows, and interview scheduling, integrated with internal HRMS.

Responsibilities:

- Developed responsive **job search and application forms** using Angular with form validation, search filters, and pagination.
- Implemented **resume upload functionality**, storing PDF files as byte arrays in the database using Spring Boot REST APIs.
- Created dynamic **Admin Dashboard** to manage job requisitions, application status, shortlisted candidates, and job visibility.
- Designed candidate-side portal for **profile creation, resume submission, skill tagging, and application tracking**.
- Integrated **role-based access** for HR, Admin, and Candidates using JWT-based Spring Security.
- Implemented backend logic for **shortlisting, email notification triggers, and job posting approval workflows**.
- Stored and queried data efficiently using **MySQL**, applying Hibernate for entity management and relationships between users, applications, and jobs.
- Developed REST APIs for modules like **Job Requisition, Candidate Profile, Interview Schedule, and Application Tracker**.

Achievements:

- Increased job application conversion rate by **65%** due to seamless application experience and mobile-friendly design.
- Reduced HR's manual effort by **70%** through automated resume filtering and dashboard-based shortlisting.
- Successfully integrated with existing **HRMS for lead-to-hire visibility** and talent pipeline analysis.

Customer Relationship Management (CRM) System – For Sales Automation

- **Role:** Full Stack Developer | **Duration:** Dec 2023 – May 2024
- **Tech Stack:** Angular, TypeScript, HTML5, CSS3, Spring Boot, Java, MongoDB, REST APIs Collaborated with cross-functional teams to build a **Customer Relationship Management (CRM) system** using **Angular, Spring Boot, and MongoDB** to streamline customer data management and enhance customer service.
- **Description:**

- Collaborated with cross-functional teams to build a Customer Relationship Management (CRM) system using Angular, Spring Boot, and MongoDB to streamline customer data management, optimize lead tracking, and enhance customer service operations.

Responsibilities:

- Designed and developed dynamic UI components using Angular and Nebular UI for modules like **Customer Profiles**, **Lead Management**, and **Support Tickets**.
- Built **RESTful APIs** in Spring Boot to manage customer records, lead sources, communication logs, and service requests.
- Integrated **MongoDB** to store unstructured and dynamic customer data such as activity logs, interaction history, and document uploads.
- Developed **real-time dashboards** to display customer engagement metrics, sales funnel stages, and conversion ratios.
- Implemented **role-based access control** for Sales, Support, and Admin users using JWT authentication.
- Automated follow-up tasks and reminders using **scheduled services** in Spring Boot.
- Enabled advanced **search and filter functionality** to quickly access specific customer profiles or leads based on custom tags and statuses.

Achievements:

- Improved lead conversion rate by **45%** by enabling faster follow-ups and automated task assignments.
- Enhanced customer support efficiency by **60%**, reducing average ticket resolution time from 3 days to 1 day.
- Empowered sales and support teams with centralized, real-time access to customer insights and communication history.
- Debugged and optimized SQL queries in MySQL and MongoDB, improving the performance of database operations by 30%.

Key Technologies: Angular, Spring Boot, MySQL, MongoDB, REST API, HTML, CSS, JavaScript, TypeScript, Git

Projects

- **I Career Assistant Web App**
 - **Tech:** ReactJS, Tailwind, Spring Boot, OpenAI API (GPT-4), MongoDB
 - **Highlights:** Resume analyzer + job description matcher + personalized improvement suggestions.

Features:

- Upload resume PDF → extract data using backend
- Match resume with job description → show skill gaps
- Auto-generate improved summary & bullet points using GPT
- Give an interview Q&A using GenAI based on job role

Impact: "Built a smart job-matching system that improved interview call response by 40% based on resume-job match accuracy."

- **AI-Driven E-Commerce Product Recommender**
 - **Tech:** ReactJS, Spring Boot or Node.js, PostgreSQL, OpenAI/ChatGPT or local ML models
 - **Highlights:** Search products via keywords, queries, or chat.
 - **Impact:**
 - "Integrated AI-based recommendation engine improving user engagement time by 50%."

Features:

- Product listing with search & filters
- Chatbot for natural language product discovery
- Personalized product recommendation (based on history or user prompts)
- Admin portal for product management

GenAI-Powered Learning Portal:

Tech: ReactJS, Firebase, OpenAI GPT, Tailwind

Highlights: Users can ask questions and get AI-generated explanations with diagrams.

Features:

- Login with Google Auth
- Ask questions about coding, math, or tech
- Get AI-generated answers (text + code + flowcharts)
- Bookmark and comment on answers

Use Case: Great for EdTech or portfolio display

Smart Document Reader & Summarizer (Resume/Contract Reader)

Tech: ReactJS, Python Flask or Spring Boot, LangChain + OpenAI, MongoDB
Highlights: Upload PDF/Word → Get summarized output using LLMs.

Features:

- Drag & drop file upload
- Parse resumes, legal contracts, or meeting minutes
- Auto-generate summaries and flag risky terms (e.g., in NDAs)
- Save summaries in database with search

Impact:

"Built a tool that reduced manual contract review time by 70%."

AI HR Chatbot with Resume Shortlisting

Tech: ReactJS, Spring Boot, MongoDB, OpenAI API
Highlights: Upload multiple resumes → AI chatbot answers queries like:

- "Who has React + Node.js experience?"
- "Find resumes with less than 30-day notice"

Features:

- Admin dashboard for resume upload
 - GPT-like search with natural queries
 - Shortlisting & tagging candidates
 - **Export shortlists to Excel**
-

Resume-Ready Project Description (Template)

AI Career Assistant – *Personal Project*

Built a smart career assistant using ReactJS, Spring Boot, and OpenAI GPT-4 to analyze resumes, match them to job descriptions, and auto-suggest improvements. Integrated PDF parsing, AI summarization, and skill-gap analysis.

Tech Stack: ReactJS, Tailwind, OpenAI API, Spring Boot, MongoDB

Achievements: Improved resume relevance scoring by 45%; reduced manual tailoring time by 60%.

Education

- **Bachelor of Technology in Electronics and Communication Engineering**
United College of Engineering and Management, Prayagraj, U.P. | 2019 – 2023 | **Marks: 80%**
- **Intermediate (CBSE)**
New R.S.J Public School, Prayagraj, U.P. | 2017 | **Marks: 65%**
- **High School (CBSE)**
New R.S.J Public School, Prayagraj, U.P. | 2015 | **Marks: 72%**

Technical Skills

- Languages: Java (Java SE, Java EE, Java 8), SQL, JavaScript, TypeScript, HTML, CSS
 - Frameworks: Spring Boot, Hibernate
 - Databases: MySQL, MongoDB
 - Tools: Eclipse, Visual Studio, Git, Tomcat, REST APIs, Tibco JasperSoft
-
